INTERNATIONAL

[Israel becomes first country to recognise Somaliland as independent state](#)

27/12/2025

Israel has officially become the first country to recognise Somaliland as an independent state, marking a historic diplomatic shift. The move has drawn sharp reactions from Somalia and the African Union, who warn it could destabilise the Horn of Africa.

Key Points

Historic Recognition: On 26 December 2025, Israel formally recognised Somaliland, a breakaway region that declared independence from Somalia in 1991.

First UN Member State: Israel is the first United Nations member to extend such recognition, though Taiwan had earlier recognised Somaliland in 2020.

Strategic Importance: Somaliland lies along the Red Sea corridor, a geopolitically vital region for trade and security.

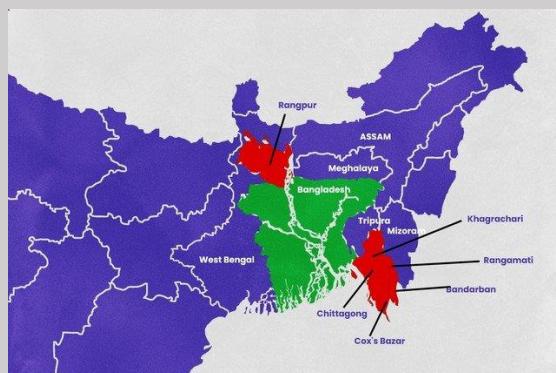

Diplomatic Ties: Israeli PM Benjamin Netanyahu and Somaliland President Abdirahman Mohamed Abdullahi signed a declaration of mutual

recognition, with plans for cooperation in agriculture, health, and technology.

Global Reactions: Somalia condemned the move as a violation of its sovereignty, while Turkey, Egypt, and the African Union also criticised Israel's decision.

Context

Somaliland has operated with its own government, military, and currency since 1991 but lacked international recognition. Israel's step could encourage other nations to reconsider their stance, though it risks heightening tensions in East Africa.

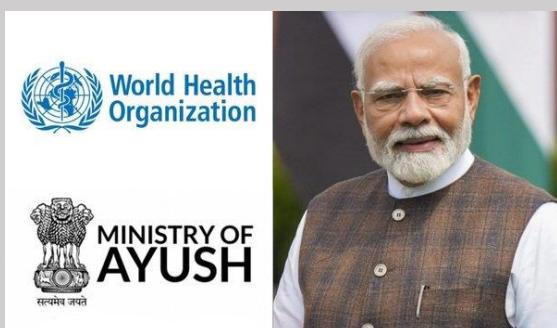

[India-Bangladesh Relations Face Strain Amid Diplomatic Closures and Political Unrest](#)

13/12/2025

On **12 December 2025**, the Government of India approved the **CoalSETU policy** to ensure **seamless, efficient, and transparent utilisation of coal resources**. The decision was taken by the **Cabinet Committee on Economic Affairs (CCEA)** chaired by **Prime Minister Narendra Modi**.

Additionally, linkage holders are allowed to **export up to 50% of the allocated coal** and can **flexibly utilise coal among group companies**.

improving operational efficiency and optimal resource utilisation.

[RBI Monetary Policy Committee cut the policy repo rate by 25 basis points to 5.25%](#)

06/12/2025

The Reserve Bank of India's Monetary Policy Committee unanimously cut the policy repo rate by 25 basis points to 5.25% in its December 2025 meeting. This marks the fourth rate reduction in 2025, bringing the cumulative cut for the year to 125 basis points. The move comes amid a backdrop of strong economic growth and subdued inflation, described by RBI Governor Sanjay Malhotra as a "rare Goldilocks period".

Key details and implications of the announcement:

Economic Forecasts: The RBI revised its FY26 GDP growth estimate upward to 7.3% (from 6.8%) and lowered its CPI inflation projection to 2% (from 2.6%).

Liquidity Measures: To ensure smoother monetary policy transmission and support liquidity, the central bank announced plans for Open Market Operations (OMO) purchases of government securities worth ₹1 lakh crore and a three-year dollar-rupee buy-sell swap of \$5 billion.

Impact on Borrowers: The repo rate cut is expected to lead to lower interest rates on loans, benefiting

borrowers through reduced Equated Monthly Instalments (EMIs) for home and auto loans.

Impact on Investors: Lower interest rates are likely to impact fixed deposit returns, while potentially boosting rate-sensitive sectors of the stock market, such as real estate, auto, and banking.

Policy Stance: The MPC has maintained a "neutral" policy stance, leaving room for future adjustments based on evolving economic conditions.

[India Achieves 50% Non-Fossil Power Capacity Target Five Years Ahead of 2030 Deadline](#)

09/12/2025

India has achieved a major clean energy milestone by installing **50% of its total power capacity from non-fossil fuel sources**, reaching its **Panchamrit target five years ahead of the 2030 deadline**. As per data tabled in the **Lok Sabha on 8 December 2025**, India's total installed power capacity stood at **485 GW as of 30 June 2025**, out of which **243 GW** came from non-fossil sources. The Standing Committee on Energy praised the **MNRE, Ministry of Power, and stakeholders** for this progress.

India has already installed **116 GW of solar capacity** and aims to reach **292 GW by 2030** as part of its larger **500 GW non-fossil power target**. To achieve this, around **176 GW of new solar capacity** must be added in the next five years. Currently, **128 GW is under implementation**, while **62 GW is in the tendering stage**.

However, the Committee highlighted key challenges such as **land acquisition delays, grid connectivity issues, inadequate energy storage, and the need to strengthen domestic manufacturing**. Land requirements are particularly critical, as **4–7 acres are**

needed per MW of solar power, and India may need **1.4–2 million hectares of land** for long-term solar expansion. This could lead to conflicts with **agriculture and ecologically sensitive areas**. The Committee urged strict adherence to the planned energy transition roadmap to sustain progress.
